

Ginkgo biloba 'Barabits Fastigiata'

Height	8-10 m
Crown	columnar, light, open crown, capricious growing
Bark and branches	brown, grey
Leaf	green
Autumn colour	yellow
Flowers	green, flowers in April
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	fairly to good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	avenues and broad streets, narrow streets, parks, squares, tree containers, cemeteries, roof gardens, industrial areas, large gardens, small gardens
Shape	clearstem tree, clearstem conifer, specimen conifer

Medium-size columnar tree growing to over 10 m with steeply rising main branches. Twigs are light brown and smooth, mature bark is grey-brown and deeply grooved when older. The leaves are slightly smaller than the species and turn golden yellow in autumn. This Hungarian selection has a columnar growth habit which is more or less the same as 'Princeton Sentry', but produces a distinctly squatter tree. When young, 'Barabit's Fastigiata' already ramifies well, meaning young trees also have a nice full crown. Its strong rising branching pattern make it suitable as an avenue tree in narrow streets.
