

Ginkgo biloba 'Fairmount'

Height	15-25 m
Crown	narrow conical, light, open crown, capricious growing
Bark and branches	grey
Leaf	green
Autumn colour	yellow
Flowers	unremarkable
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	fairly to good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	avenues and broad streets, narrow streets, parks, squares, tree containers, cemeteries, roof gardens, industrial areas, large gardens
Shape	clearstem tree, clearstem conifer, specimen conifer

An American selection with a narrow, pyramidal manner of growth that grows slowly, particularly when young. The main stem grows remarkably straight and often bears lateral branches as low as the trunk base. Height 15 - 25 m, eventual width to approx. 9 m. The fan-shaped leaves and flower buds are on short shoots. The leaves grow in bundles of 3-5 together and have an incised top. Adding decorative value is the golden yellow colour this tree turns in autumn. 'Fairmount' is a male selection that is excellently suited as a street and avenue tree, thanks to its lack of fruit. It requires a site with ample light and tolerates heat well. Winter hardiness zone: 5a
