

Pinus heldreichii 'Lindenhof'

Height	6-8 m
Crown	ovoid / egg-shaped, dark, dense crown
Bark and branches	brown, grey, yellowbrown
Leaf	green, evergreen
Flowers	yellow, flowers in May, fragrant flowers
Fruits	purple/brown, blue, green
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates no paving
Winter hardiness zone	6a (-23,3 to -20,6 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	parks, tree containers, cemeteries, roof gardens, large gardens, small gardens
Shape	specimen conifer
Synonyms	Pinus leucodermis 'Lindenhof'

Lovely, densely branched tree growing to around 8 m. The crown is ovoid to narrow oval and stays slender when mature. The thick, mature bark is grey-brown and deeply grooved revealing the light brown-yellow bast. Like the species, the tips of the stiff, glossy, dark green needles are curved inwards, which is particularly striking on young shoots. The cones are in twos or threes on short stems. They are dark green to bluish purple, turning matt light brown to grey when ripening. Attractive, quite slender form that is suitable for gardens too. Has few demands as to soil, tolerates limy soil and wind.
