

Taxus baccata 'Overeynderi'

Height	3-4 m
Crown	ovoid / egg-shaped, dark, dense crown
Bark and branches	flaking, reddish brown
Leaf	green, evergreen
Flowers	yellow, flowers in April
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	parks, tree containers, cemeteries, roof gardens, industrial areas, large gardens, small gardens
Shape	specimen conifer

Good, wide upright growing cultivar with a regular ovoid crown, up to 3 to 4 m. This Taxus is very densely branched with brown twigs. Old bark is brown-red and flaking. At 2 cm long the needles are relatively short. They are about 0.2 cm wide and mid-green. Although 'Overeynderi' usually blossoms abundantly, the blossom is male so it does not produce any fruit. The tree bears some resemblance to 'Major' and 'Pyramidalis' but it has denser branching and a regular crown shape. Extremely suitable for parks and gardens and can also be used as a hedge. Created in 1923 as seedling of 'Fastigiata'.
