

Acer negundo 'Aureomarginatum'

Height	6 - 10 m, fast growing
Crown	wide, egg-shaped, half-open crown
Bark and branches	young twigs shiny green and pruinose
Leaf	unevenly feathered, yellow-white margins, up to 20 cm, feathered leaf
Flowers	female, pendent in thick clusters, April
Fruits	falcate, winged, in racemes
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	few requirements, also in calcareous soil
Paving	tolerates no paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	moderate to poor
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for butterflies
Application	parks, cemeteries, industrial areas, large gardens
Shape	clearstem tree, multi-stem treem
Origin	Dieck Baumschulen, Germany, 1885

Small to medium-sized tree (sometimes large shrub) with a wide, upright growth habit, reaching a height of circa 6 - 10 m. The differences with the other cultivars of *A. negundo* are few, but for the colour of the leaves. 'Aureomarginatum' has dark green leaves with creamy-yellow to cream coloured margins. Regularly completely creamy-yellow leaves appear on the tree too. During the summer months this “variegated” effect becomes less conspicuous. The tree grows both on wet and dry sites. It has a deep rooting main root which branches out strongly. This is an old female cultivar, dating from 1885. 'Aureomarginatum' can perfectly be applied in parks and large gardens.
