

Acer platanoides 'Fairview'

Height	10 - 15 m
Crown	oval, dark, dense crown
Bark and branches	twigs light brown, bark smooth, dark grey
Leaf	5-lobed, reddish purple on emerging, bronze-green in summer, about 20 cm, autumn colour yellow-orange
Flowers	yellow-green, in corymbs, April, before the leaf development
Fruits	winged nutlets (samara), 3.5 - 4.5 cm long
Spines/thorns	None
Toxicity	has toxic components
Soil type	any soil, except peat
Soil moisture	withstand short flood
Paving	tolerates partial paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good: cannot tolerate sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
Application	avenues and broad streets, narrow streets, parks, squares, cemeteries, industrial areas, large gardens, windbreaks
Shape	clearstem tree, multi-stem treem
Origin	USA

This cultivar is an American selection that resembles the cultivars 'Schwedleri' and 'Deborah'. The upright oval crown, however, remains narrower and grows more upright than 'Schwedleri' and 'Deborah'. 'Fairview' can reach a height of circa 15 m. The leaf sprouts reddish purple, but turns bronze-green later in the season. The flowering is of the species. It is a good avenue and street tree. 'Fairview' demands little from the soil, but does not tolerate stagnating groundwater. The tree is good wind resistant. Winter hardiness zone: 4.
