The cultivar 'Bruchem' is a relatively recent cultivar found in the village of the same name in Gelderland (NL). It is a very healthy cultivar, a vigorously growing street tree with an egg-shaped crown and straight leader. When juvenile it grows almost fastigiate. Maturing the tree grows wider. It can reach a height of 20 m. The leaves are medium-sized and rather thick. The surface is deep green and the underside is blue-grey. Flowers are of the species. The tree is applied as a street and avenue tree. 'Bruchem' tolerates wet, cold soils and demands hardly anything from the soil. Wind resistant. Winter hardiness zone: 4
