

Acer rubrum SUMMER RED ('HOSR')

Height	12-15 m
Crown	broad conical, dark, dense crown
Bark and branches	grey
Leaf	green
Autumn colour	yellow
Flowers	red, flowers in March
Fruits	red
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, acid soil
Paving	tolerates partial paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	bad
Other resistances	resistant to frost (WH 1 - 6)
Application	avenues and broad streets, parks, squares, cemeteries, large gardens
Shape	clearstem tree, multi-stem treem

Strongly growing selection with an oval, later broad pyramidal crown, growing to a height of about 15 m. The young leaves are purplish red to red. The summer shoots also bear these coloured leaves, which contrast well with the dark green mature leaf. Unlike other A. rubrum cultivars, the autumn colour is mainly yellow. Highly suitable as an avenue, street and park tree. Also fine for use along driveways and such like. Its growth will stagnate on calcareous soil. In such soil, as with very dry soil, the autumn change of colour will be less noticeable. Intolerant to (sea) wind.
