

Acer tataricum HOT WINGS

('Garann')

Height	4-6 m
Crown	round/spherical, dark, dense crown
Bark and branches	grey
Leaf	green
Autumn colour	yellow, orange, red
Flowers	white, flowers in May
Fruits	red
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil, all soil types
Soil moisture	suitable for dry soil
Paving	tolerates partial paving
Winter hardiness zone	3 (-40,0 to -24,5 °C)
Wind resistance	fairly to good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt, valuable for bees (honey plant)
Application	parks, tree containers, cemeteries, industrial areas, large gardens
Shape	clearstem tree

Small but broad tree with a broad, virtually round crown. The leaves are 3-lobed, the middle lobe being significantly longer than the two side lobes. The leaves are bright green, turning yellowy orange to bright red in autumn. The fruits also turn bright red for several weeks as they ripen. This happens before the leaves change colour in autumn, so that the red fruits stand out attractively. Both the fruit and the autumn coloration benefit from a sunny location. A very hardy plant that flourishes on almost any soil type and is highly resistant to air pollution, drought and road salt.
