

Celtis julianae

Height	20 - 30 m
Crown	umbel-shaped, half-open crown
Bark and branches	twigs dark brown with yellow-brown hairs, bark grey, smooth
Leaf	elliptical to ovate or obovate, 6 - 13 cm, tip tapering
Flowers	green, inconspicuous, April/May
Fruits	round drupe, purple to orange, 1 – 1.5 cm
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	well drained soil, tolerates drought
Soil moisture	suitable for dry soil
Paving	tolerates paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	slightly susceptible
Other resistances	resistant to frost (WH 1 - 6)
Application	avenues and broad streets, parks, squares, cemeteries, industrial areas, large gardens
Shape	clearstem tree
Origin	Central China

Fast growing, large tree with a fairly loose, umbel-shaped crown. The long, projecting and overhanging first-year twigs give the tree an elegant appearance. The twigs are dark brown, turning grey later. The leaves vary in shape from ovate to elliptical or obovate. The leaf's underside has yellow to orange-yellow hairs, sometimes only on the veins. The inconspicuous flowers are followed by purple to orange, round drupes. Prefers warm summers. Prefers well-drained soil. Can tolerate drought and air pollution.
