

Cornus asperifolia var. drummondii

Height	4-7 m
Crown	round/spherical, dark, dense crown
Bark and branches	brown
Leaf	green
Flowers	yellowwhite, flowers in May
Fruits	white, blue
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
Soil moisture	suitable for dry soil, withstand short flood
Paving	tolerates partial paving
Winter hardiness zone	5 (-28,8 to -23,4 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	parks, cemeteries, large gardens
Synonyms	Cornus drummondii

Usually a large, round shrub but eventually growing into a small tree. The twigs are initially purple, turning green-grey after 3 years. The drummondii variety is typified by its leaves, which are hairier and have a more elongated tip. The flowers are grouped in erect, umbel-shaped corymbs of about 8 cm. The individual flowers are small and yellowish white. They open in early summer. The berry-like fruits are pale blue to white. Grows wild in scrub, clay banks and thinly wooded areas, also in dry riverbeds. Tolerates a lot of water for a while.
