

Cornus florida 'Pluribracteata'

Height	4-7 m
Crown	flatened spherical, dark, dense crown, capricious growing
Bark and branches	brown, grey
Leaf	green
Autumn colour	purple
Flowers	white, flowers in May
Fruits	red
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	parks, cemeteries, large gardens, small gardens, patio gardens
Shape	multi-stem treem
Synonyms	Cornus florida f. pluribracteata

Grows from a shrub into a small, multi-stemmed tree with a broad, somewhat irregular, round crown. When maturing the branches may hang down a little, making the crown wider than it is high. The leaves are dark green and turn purplish pink in autumn. Each head of inconspicuous flowers is surrounded by seven or eight white bracts. These vary in size and shape, making the flowering pattern decorative and full. The plant is shallow rooting with a fibrous root system and requires humic soil, which is not too dry.
