

## Cornus kousa 'Summer Stars'

<b>Height</b>	6-8 m
<b>Crown</b>	oval, dark, dense crown, capricious growing
<b>Bark and branches</b>	brown, grey
<b>Leaf</b>	green, bluegreen
<b>Autumn colour</b>	yellow, red, purple
<b>Flowers</b>	white, flowers in May
<b>Fruits</b>	red
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	loamy soil, sandy soil, peaty soil, acid soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	6b (-20,5 to -17,8 °C)
<b>Wind resistance</b>	good
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
<b>Application</b>	parks, tree containers, cemeteries, roof gardens, large gardens, small gardens, patio gardens
<b>Shape</b>	multi-stem treem

Grows from a shrub into a multi-stemmed tree up to about 8 m, with a broad, oval crown. The leaf is dark green on top and blue-green on the underside, with a slightly undulate leaf margin. The autumn colour is reddish purple. Each flower head is surrounded by four white, freestanding to slightly overlapping bracts. The flower clusters remain on the plant for very long, often about 6 weeks. When the first characteristically red, strawberry-like fruits form, the last flowers are often still on the tree. The plant is shallow rooting with a fibrous root system and requires humic soil, which is not too dry.
