

Crataegus ×persimilis 'Splendens'

Height	8 m
Crown	flattened spherical, half-open crown, capricious growing
Bark and branches	brown
Leaf	green
Autumn colour	yellow, orange, red
Flowers	white, flowers in May
Fruits	red
Spines/thorns	Yes
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil
Paving	tolerates no paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	avenues and broad streets, parks, cemeteries, large gardens, small gardens, patio gardens
Shape	clearstem tree, multi-stem treem
Synonyms	Crataegus x prunifolia 'Splendens'

This cultivar grows more regularly and higher than the species. Height approx. 8 m, with a broad flattened crown. The branches bear many thorns. These are approx. 4 cm long. The leaves are broad oval and glossy dark green with a sharply serrated edge. The autumn colour is remarkable: red, orange and yellow tints. The white flowers appear in felt-like umbels in May and June. They are followed by bright red fruits, with a diameter of approx. 1 cm, that remain on the tree for a long time. For parks, avenues and small gardens. Winter hardiness zone: 5a
