

Fagus sylvatica 'Anniek'

Height	15-20 m
Crown	columnar, dark, dense crown
Bark and branches	grey
Leaf	green
Autumn colour	yellow
Flowers	yellowgreen, flowers in May
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, peaty soil, calcareous soil
Paving	tolerates no paving
Winter hardiness zone	5b (-26,0 to -23,4 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Application	avenues and broad streets, narrow streets, parks, cemeteries, large gardens
Shape	clearstem tree, feathered tree

Narrow, columnar tree with vertical central leaderes, lateral branches and twigs. The branching starts low on the trunk. Very predictable in shape: similar to the well-known 'Dawyck'. The leaf is glossy dark green and 4 - 10 cm in size, becoming matter later in summer. Stays on the tree, dry and withered, in winter, thereby visually reinforcing the columnar habit even in winter. Blossoms less profusely than *F. sylvatica*, so forms fewer fruits. Prefers well-drained, humic soil, not too wet. Moderately wind resistant. Was selected as a seedling of *F. sylvatica*.
