

## Fagus sylvatica 'Quercifolia'

<b>Height</b>	20 m
<b>Crown</b>	round/spherical, dark, dense crown
<b>Bark and branches</b>	grey
<b>Leaf</b>	green
<b>Autumn colour</b>	yellow
<b>Flowers</b>	yellowgreen, flowers in May
<b>Fruits</b>	brown
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	loamy soil, sandy soil, peaty soil, calcareous soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	5b (-26,0 to -23,4 °C)
<b>Wind resistance</b>	moderate
<b>Other resistances</b>	resistant to frost (WH 1 - 6)
<b>Application</b>	parks, cemeteries, large gardens
<b>Shape</b>	clearstem tree, feathered tree

Fagus sylvatica 'Quercifolia' is a fairly tall tree with a spreading spherical crown. Height circa 20 m. The green leaf has some resemblance with that of the oak (Quercus). It is ovate to oblong and has short, wide lobes. The margin is sometimes toothed. The leaf has a very regular shape and turns yellow brown in autumn. Inconspicuous flowering. 'Quercifolia' thrives in soil that is not too wet, well-drained and rich in humus content. Suitable as a park tree and a solitary. Moderate wind resistance. Winter hardiness zone: 5b
