

Fagus sylvatica 'Rohan Gold'

| | |
|-----------------------------|---|
| Height | 14-16 m |
| Crown | round/spherical, dark, dense crown |
| Bark and branches | grey |
| Leaf | green, yellow, yellow |
| Flowers | yellowgreen, flowers in May |
| Fruits | brown |
| Spines/thorns | None |
| Toxicity | usually not toxic to people, (large) pets and livestock |
| Soil type | loamy soil, sandy soil, peaty soil, calcareous soil |
| Paving | tolerates no paving |
| Winter hardness zone | 5b (-26,0 to -23,4 °C) |
| Wind resistance | moderate |
| Other resistances | resistant to frost (WH 1 - 6) |
| Application | parks, cemeteries, large gardens |
| Shape | clearstem tree |

Fagus sylvatica 'Rohan Gold' grows in a compact way and has a round crown. Height circa 14 - 16 m. The leaf unfolds in bright yellow colours and turns to light green soon. This 'prevents' the tree from scorching. The leaf is oblong-ovate, moderately to deeply dissected with rounded lobes and 4 - 7 cm in size. The inconspicuous inflorescence is followed by 1- 2 cm large nutlets. This crossing between 'Rohani' and 'Zlatia' was introduced by Arboretum Trompenburg (Rotterdam, NL) in 1973. Winter hardness zone: 5b
