

Fagus sylvatica 'Rohanii'

Height	12-14 m
Crown	round/spherical, dark, dense crown
Bark and branches	grey
Leaf	reddisch brown, red
Flowers	yellowgreen, flowers in May
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, peaty soil, calcareous soil
Paving	tolerates no paving
Winter hardiness zone	5b (-26,0 to -23,4 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Application	parks, tree containers, cemeteries, roof gardens, large gardens
Shape	clearstem tree, feathered tree

Fagus sylvatica 'Rohanii' is a relatively small beech with a compact round crown. Due to its slow growth it does not get taller than 12 - 14 m. The dark red-brown leaf unfolds bright red. It is oblong-ovate, irregular, moderately to deeply dissected with rounded lobes and unfolds circa one week earlier than F. sylvatica. The size of the leaf is 4 - 8 cm. Inconspicuous inflorescence followed by nutlets. Park tree or solitary. Prefers not too wet, well-drained soil, rich in humus content. Moderate wind resistance. Winter hardiness zone: 5b Fagus sylvatica 'Rohanii' is a relatively small beech. The emerging leaves are a bright red and appear a week earlier than those of the common beech.
