

Fraxinus angustifolia

Height	15-20 m
Crown	broad ovoid, half-open crown
Bark and branches	brown, grey
Leaf	green, feathered leaf
Autumn colour	yellow, red
Flowers	yellowgreen, flowers in April
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, nutrient-poor soil, calcareous soil
Soil moisture	suitable for dry soil, suitable for wet soil
Paving	tolerates paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Application	avenues and broad streets, parks, squares, cemeteries, large gardens, windbreaks
Synonyms	Fraxinus oxycarpa

Fraxinus angustifolia (syn. F. oxycarpa) has a wide ovoid crown. Height 15 - 20 m. Important difference with F. excelsior are the much thinner twigs. Mature bark clearly furrowed. The narrow, shiny green leaf is odd-pinnate with 2 - 6 leaf pairs and a length of 15 - 25 cm. Autumn colour is yellow to wine red. Inflorescence in bunches, dioecious flowers, before the leaves appear. Forms a 2 - 6 cm large, winged nut. For park, wide avenues and streets. Wind resistant. Winter hardiness zone: 6b
