

Fraxinus excelsior 'Allgold'

Height	14-16 m
Crown	round/spherical, half-open crown
Bark and branches	yellow
Leaf	yellow, feathered leaf
Flowers	little to none
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for wet soil
Paving	tolerates partial paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Application	parks, squares, cemeteries, large gardens
Shape	clearstem tree

Fraxinus excelsior 'Allgold' is a strikingly beautiful ash with golden yellow twigs and contrasting black buds. With regard to use, to be preferred to 'Jaspidea', because it does not bear or hardly bears fruits. 'Allgold' has a round crown and attains a height of 14 - 16 m. The odd-pinnate leaf is light green in spring and turns deep yellow in late summer and autumn, 5 - 8 cm long. It has hardly any or no flowers and is used as a solitary and a park tree. Prefers moist, rich soil. Little susceptible to wind. Winter hardiness zone: 4
