

Fraxinus excelsior 'Atlas'

Height	20-25 m
Crown	narrow conical, half-open crown
Bark and branches	brown, grey
Leaf	green, feathered leaf
Flowers	yellowgreen, flowers in April
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for wet soil, withstand short flood
Paving	tolerates partial paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Application	avenues and broad streets, parks, squares, cemeteries, coastal areas, industrial areas, large gardens, windbreaks
Shape	clearstem tree, multi-stem tree

Fraxinus excelsior 'Atlas' is a relatively late-sprouting cultivar which can be recognized by its slender habit. It has a pyramidal to conical crown and attains a height of 20 - 25 m. The shiny dark green leaf is odd-pinnate and has a yellow autumn colour. After the inconspicuous male inflorescence there are no fruits. Useful as an avenue and street tree. 'Atlas' prefers rich, moist soil. Wind resistant. Winter hardiness zone: 4
