

## Fraxinus excelsior 'Nana'

<b>Height</b>	4-6 m
<b>Crown</b>	round/spherical, half-open crown
<b>Bark and branches</b>	brown, grey
<b>Leaf</b>	green, feathered leaf
<b>Flowers</b>	none
<b>Fruits</b>	fruitless cultivar
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, calcareous soil
<b>Soil moisture</b>	suitable for wet soil, withstand short flood
<b>Paving</b>	tolerates partial paving
<b>Winter hardiness zone</b>	4 (-34,4 to -28,9 °C)
<b>Wind resistance</b>	good
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
<b>Application</b>	narrow streets, parks, squares, tree containers, cemeteries, roof gardens, coastal areas, industrial areas, large gardens, small gardens, patio gardens

Fraxinus excelsior 'Nana' is a shrub, sometimes grafted on a standard or half-standard of F. excelsior. As a tree it can attain a height of 4 - 6 m. The crown is spherical and very open, which is why it has never become popular. The bark is grey brown. The compound, dark-green leaf is odd-pinnate, 15 - 20 cm large and has 9 - 11 leaflets that are slightly smaller than of the F. excelsior. It has no flowers or fruits. 'Nana' is applied as a decorative shrub in (small) gardens, little squares and narrow streets with wide green verges. It prefers moist, nutritive soil. Winter hardiness zone: 4
