

Fraxinus sieboldiana

Height	8-10 m
Crown	broad ovoid, dark, dense crown
Bark and branches	grey
Leaf	green, feathered leaf
Flowers	white, flowers in May
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for dry soil
Paving	tolerates partial paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Application	parks, cemeteries, industrial areas, large gardens
Shape	clearstem tree, multi-stem treem
Synonyms	Fraxinus mariesii

Fairly slow growing, large shrub to small or medium-size tree. Rarely taller than 10 m under cultivation. The densely branching crown is a broad ovoid, often already branching at low level. The axillary and terminal panicles consist of male and female flowers. These are white and very decorative. Is closely related to *F. ornus* but differs in its denser branch pattern, smaller leaf, narrower leaf segments and the glandular hairs on bud scales, leaf stems and flower clusters. Attractive park tree, prefers somewhat drier, preferably calcareous soil and a warm, sunny position.
