

Hamamelis ×intermedia

'Westerstede'

Height	4-5 m
Crown	vase-shaped, dark, dense crown, capricious growing
Bark and branches	brown
Leaf	green
Autumn colour	yellow
Flowers	light yellow, flowers in February
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Application	parks, tree containers, cemeteries, large gardens, small gardens, patio gardens
Shape	clearstem tree, multi-stem treem

Nicely branching, sturdy shrub to small tree about 3.5 m high and 2.5 m broad, with vase-shaped, dense crown. Grows easily and naturally forms an attractive, regular crown. The slightly glossy dark green leaf turns yellow in autumn. Blossoms around February/early March, making it one of the latest blossoming cultivars. The light yellow flowers, measuring over 3 cm, have hardly any fragrance. 'Westerstede' may not be the most beautiful Hamamelis for its flowers, but it is certainly a very healthy, cultivar with good growth. The late blossoming is also a good attribute.
