

Hamamelis japonica 'Pendula'

Height	3 m
Crown	broad weeping, light, open crown, capricious growing
Bark and branches	brown, grey
Leaf	green, yellowgreen
Autumn colour	yellow
Flowers	light yellow, flowers in February
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Application	parks, tree containers, cemeteries, large gardens, small gardens, patio gardens
Shape	feathered tree

Broad, weeping shape with an irregular habit and very pendulous branches. This Japanese cultivar grows naturally as a shrub, attaining a height of about 1 m and a width of 3 m. If the central leader is grown with stake support, the tree can grow several metres high. The sprouting leaf is light yellow-green, turning slightly glossy dark green in summer and buttery yellow in autumn. Blossoms around February/March with pendent, light yellow flowers measuring about 2 cm. They have a slight fragrance. 'Pendula' is the only Hamamelis with a weeping growth pattern and flowers of any decorative value.
