

## Ilex xaltaclerensis 'Camelliifolia'

Height	10-12 m
Crown	broad conical, dark, dense crown
Bark and branches	brown, green
Leaf	evergreen
Flowers	white, flowers in May
Fruits	red
Spines/thorns	None
Toxicity	has toxic components
Soil type	sandy soil, peaty soil, calcareous soil
Paving	tolerates no paving
Winter hardiness zone	7b (-14,9 to -12,3 °C)
Wind resistance	good
Other resistances	can withstand wind
Fauna tree	can withstand wind, provides food for birds
Application	parks, tree containers, cemeteries, coastal areas, large gardens, small gardens, patio gardens
Shape	multi-stem tree

Medium-size tree, rarely large, with densely branching pyramidal crown up to about 12 m. Young twigs are purple, mature bark is green-brown and smooth. The leaves are glossy dark green and up to 13 cm long. The margins are smooth or have a few small prickles. The flowers are small and fairly inconspicuous. They open white from pale purple buds. They are female and are followed by glossy, dark red, fleshy drupes (commonly called 'berries') about 10 mm across. Prefers a humic, moist but well-drained soil and tolerates either acidic or calcareous soil. Also suitable for use as tall hedge.
