

# Magnolia ×brooklynensis

## 'Woodsman'

<b>Height</b>	4 m
<b>Crown</b>	flatened spherical, dark, dense crown, capricious growing
<b>Bark and branches</b>	brown, grey
<b>Leaf</b>	green
<b>Flowers</b>	voiletpink, flowers in April, fragrant flowers
<b>Fruits</b>	inconspicuous
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
<b>Paving</b>	tolerates partial paving
<b>Winter hardiness zone</b>	6 (-23,3 to -17,8 °C)
<b>Wind resistance</b>	good
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Application</b>	avenues and broad streets, parks, squares, cemeteries, large gardens, small gardens
<b>Shape</b>	feathered tree

Grows from a shrub into a small tree with a broad, ovoid to flat-topped spherical crown with a height of about 4 m. The flower buds only develop in spring, so they cannot freeze in the winter. Depending on the temperature, the fragrant flowers open around mid-April. They are up to 15 cm in diameter and have an unusual but extremely attractive colour pattern. The outer petals are soft greenish-yellow to light olive green and the inner petals are a soft purplish pink. The inside of the leaves is cream.
