

Magnolia ×soulangeana 'Lennei'

Height	6-8 m
Crown	broad vase-shaped, dark, dense crown, capricious growing
Bark and branches	brown, grey
Leaf	green
Flowers	pinkviolet, cream white, flowers in April
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates partial paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	parks, tree containers, cemeteries, roof gardens, large gardens, small gardens
Shape	multi-stem treem

Grows from a large, densely branching shrub into a small, multi-stemmed tree with a broad vase-shaped to broad ovoid crown, eventually attaining a height of about 8 m. The flowers have a wide tulip shape. The fairly wide petals are an even, warm pinkish purple on the outside and creamy white on the inside. The flowers open around mid to late April, somewhat later than other *M. soulangeana* cultivars. Was discovered in the mid-19th century in Lombardy, northern Italy, and named after the German botanist Peter Joseph Lenné. Suitable for parks and gardens.
