<b>Other resistances</b>	resistant to frost (WH 1 - 6)
<b>Application</b>	avenues and broad streets, parks, squares, cemeteries, large gardens, small gardens
<b>Shape</b>	clearstem tree, multi-stem treem
<b>Synonyms</b>	Magnolia denudata 'Yellow River'

Small to medium size tree with a broad ovoid crown, up to about 8 m. This cultivar, imported from China, remains smaller than others in the species. The young twigs initially bear hairs but lose these after the first season. Untypically of the species, the large, vase-shaped flowers are cream to light yellow. The petal base is often light yellow, while the tip is cream. This gives the tree a 'yellow' appearance. The flowers have a delightful, citrus-like fragrance. The tree blossoms fairly profusely even when young, making it an attractive park tree.
