

Magnolia sieboldii

Height	4 m
Crown	round/spherical, dark, dense crown, capricious growing
Bark and branches	brown, grey
Leaf	green
Flowers	white, flowers in June, fragrant flowers
Fruits	red, pink
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for butterflies
Application	parks, tree containers, cemeteries, large gardens, small gardens, patio gardens
Shape	clearstem tree, multi-stem tree

Large, densely branching shrub, growing after many years into a small tree with a round crown. Grows to around 4 m high and wide. The obovate to elliptical leaves are blue-green in colour, especially on young shoots. The large, nodding flowers, about 10 cm in size, only open around late June/early July. They have a delightful, citrus-like fragrance and consist of 9 pure white petals. The pistils are green but the stamens are pink with dark red, contrasting beautifully with the white flowers. A splendid species from China, Korea and Japan. Its shrub-like nature makes it suitable for parks and gardens.
