Malus ×atrosanguinea

Height	4-6 m
Crown	flatened spherical, half-open crown
Bark and branches	grey
Leaf	green
Flowers	pink, flowers in May
Fruits	yellow, green, reddisch brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
Paving	tolerates paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	parks, squares, tree containers, cemeteries, industrial areas, large gardens, small gardens
Shape	multi-stem treem

A natural hybrid between M. halliana and M. toringo. The crown is flattened spherical, growing broadly outwards with somewhat pendulous branches. Young twigs are purple-red. The deep dark green elliptical leaves are approx. 9 cm long and have a sharply serrated edge. Sometimes the leaf edge is slightly lobed. M. x atrosanguinea produces abundant flowers, with scarlet red flower buds and flowers that turn pink when fully opened. The flowers are single and do not fade when finishing flowering. The fruit, with a diameter of approx. 1.2 cm, is relatively small. The fruit is yellowish-green with a brownish-red tint. For parks, public gardens and small gardens. Winter hardiness zone: 5a
