

Malus baccata 'Gracilis'

Height	4-6 m
Crown	broad weeping, half-open crown
Bark and branches	brown
Leaf	green
Flowers	white, flowers in May
Fruits	yellow, orange
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
Paving	tolerates no paving
Winter hardiness zone	3 (-40,0 to -24,5 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	parks, tree containers, cemeteries, industrial areas, large gardens, small gardens, patio gardens
Shape	clearstem tree, multi-stem tree

A broad weeping tree with a height of 4 - 6 m. The twigs are thin and the leaves narrow and glossy green. 'Gracilis' flowers in May, producing small white flowers with a diameter of approx. 3 - 4 cm. In the bud they are dark red. The flowers are single. The yellow fruit, that later turns more orange and measures approx. 1 cm in diameter, appears after flowering. The tree makes heavy demands on the soil as regards moisture supply and fertility. For planting in parks and small gardens. 'Gracilis' is only slightly resistant to scab and pretty resistant to mildew. Winter hardiness zone: 3
