

## Malus baccata 'Street Parade'

<b>Height</b>	5 - 6 (8) m
<b>Crown</b>	narrow ovoid to ovoid, half-open crown
<b>Bark and branches</b>	hairless, dark brown
<b>Leaf</b>	ovoid to broad elliptical, olive green, 4 - 8 cm
<b>Flowers</b>	pure white, pink when in bud, single, early to mid-May
<b>Fruits</b>	round, shiny purple-red to brownish-purple, Ø approx. 1.5 cm
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	nutritious, well drained soil
<b>Paving</b>	tolerates paving
<b>Winter hardiness zone</b>	3 (-40,0 to -24,5 °C)
<b>Wind resistance</b>	good, susceptible to sea wind
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
<b>Application</b>	avenues and broad streets, narrow streets, parks, squares, tree containers, cemeteries, roof gardens, industrial areas, large gardens
<b>Shape</b>	clearstem tree, multi-stem tree
<b>Origin</b>	T. van den Oever B.V., Haaren, The Netherlands, 1982
<b>Synonyms</b>	Malus baccata 'Pyramidalis Grandiflora'

Small tree with a fairly narrow crown, which makes it particularly popular as a street tree. The twigs and bark are hairless and dark brown. The leaves emerge light green but turn olive green in the summer. Young leaves carry light hairs on the underside. Malus baccata starts to flower as early as late April. The flowers, almost 5 cm in size, grow in bundles of 4 to 8 together. In the bud the flowers are pink but they turn bright white when open. The fairly hard fruits are glossy purple-red to brownish-purple. 'Street Parade' stands up exceptionally well to understory and grows best on nutritious, preferably not too dry soils. The tree is mildew-free and only slightly sensitive to scab. Allowing a solitary planted shrub to grow into a multi-trunked tree can produce an attractive effect.
