

Malus hupehensis 'Arie Mauritz'

Height	5-7 m
Crown	round/spherical, half-open crown
Bark and branches	brown, grey
Leaf	green
Flowers	pinkwhite, flowers in May
Fruits	red
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
Paving	tolerates paving
Winter hardiness zone	5 (-28,8 to -23,4 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	parks, squares, cemeteries, industrial areas, large gardens, small gardens, patio gardens
Shape	clearstem tree

Strong, small tree with a broad ovoid crown, up to about 7 m. When young, the crown has a strong, upright growth pattern, it becomes round when mature. The trunk grows to a good size. In May the pink-white flowers bloom out of light pink buds. The flowers are followed by small, shiny red crab apples. Bears abundant fruit, but this is hardly a nuisance given their small size. Healthy cultivar that is not susceptible to scab or mildew. Came out as the best crab apple in PPO Lisse's culture value survey of avenue trees. Jan P. Mauritz named the tree after his father.
