

Malus 'Profusion'

Height	6-7 m
Crown	broad ovoid, half-open crown
Bark and branches	brown
Leaf	green, purplegreen, reddisch brown
Autumn colour	red
Flowers	dark violetred, flowers in May
Fruits	red, purple/brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
Paving	tolerates paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	narrow streets, parks, squares, cemeteries, industrial areas, large gardens, small gardens, patio gardens
Shape	clearstem tree, multi-stem treem

Malus 'Profusion' is a tree with a round, later ovoid crown with somewhat pendulous branches. Height 6 - 7 m. The purplish-green leaves measure 6 - 10 cm, are sometimes 3-lobed and take on a brownish-red colour in the autumn. Deep red flower buds give way to dark purple-red flowers. The flowers are single and approx. 4 cm in diameter. The fruits start out dark purple but later turn blood red and have a diameter of 1 - 1.5 cm. The tree can be used in streets and gardens. It makes heavy demands on the soil as regards moisture supply and fertility. 'Profusion' is sensitive to scab. Winter hardiness zone: 4
