

Malus SUGAR TYME ('Sutyzam')

| | |
|------------------------------|--|
| Height | 5-6 m |
| Crown | oval, half-open crown |
| Bark and branches | brown |
| Leaf | green |
| Flowers | white, flowers in May, fragrant flowers |
| Fruits | red, purple/brown |
| Spines/thorns | None |
| Toxicity | usually not toxic to people, (large) pets and livestock |
| Soil type | clayed soil, loamy soil, sandy soil, acid soil, calcareous soil |
| Paving | tolerates paving |
| Winter hardiness zone | 5 (-28,8 to -23,4 °C) |
| Wind resistance | good, susceptible to sea wind |
| Other resistances | resistant to frost (WH 1 - 6), can withstand wind |
| Fauna tree | resistant to frost (WH 1 - 6), can withstand wind, provides food for birds |
| Application | parks, squares, tree containers, cemeteries, industrial areas, large gardens, small gardens, patio gardens |
| Shape | clearstem tree, multi-stem treem |
| Synonyms | Malus 'Sutyzam' |

Small tree with oval crown growing to 6 m tall. The lateral branches are quite horizontal but the crown stays relatively narrow due to good branching. The sprouting leaf is bright green and turns dark green later in the season. In May, white flowers emerge from pale pink buds. The fragrant flowers are approx. 3.5 cm and are followed by approx. 1.2 cm, red to purple-red crab apples. SUGAR TYME was introduced by Lake County Nursery in 1988 and is highly valued in the USA for its rich blossom and excellent fruit yield. Only slightly susceptible to scab.
