

Platanus ×hispanica 'Pyramidalis'

Height	15-20 m
Crown	narrow vase-shaped, half-open crown
Bark and branches	flaking, greygreen
Leaf	green
Flowers	yellowgreen, flowers in May
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil
Paving	tolerates paving
Winter hardiness zone	6a (-23,3 to -20,6 °C)
Wind resistance	moderate to good
Other resistances	resistant to frost (WH 1 - 6), resistant to de-icing salt
Application	avenues and broad streets, parks, squares, cemeteries, large gardens, windbreaks
Shape	clearstem tree, multi-stem treem

A cultivar that remains narrower and smaller than the species. 'Pyramidalis' has a narrow pyramidal crown that later turns vase-shaped and attains a height of 15 - 20 m. Later the lower branches hang down somewhat but the crown always remains narrow. The grey-green bark flakes off less than that of the species and has a rougher appearance. The leaves are broader than they are long and are slightly hairy on the underside. In the autumn the leaves turn colour to a brownish yellow. Fallen leaves do not rot easily. Plane trees are very resistant to hard surfaces but surface roots can push the surrounding paving upwards. Takes pruning very well, even in old wood. Young branches break relatively easily. Winter hardiness zone: 6a
