

Prunus incisa 'Lotte'

Height	6-8 m
Crown	vase-shaped, dark, dense crown
Bark and branches	brown, grey
Leaf	green
Autumn colour	orange, red
Flowers	white, flowers in March
Fruits	purple/brown, black
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
Application	parks, cemeteries, large gardens, small gardens, patio gardens

Small, densely branched tree with an irregular manner of growth, mostly with a fan-shaped to rounded crown. Height 6 - 8 m. The thin twigs droop and are grey-brown. The oval to obovate/ovoid leaves taper to a point and measure 3 - 6 cm. The leaf edge is double serrated. The leaves take on a yellow to orange colour in the autumn. Produces many small single white flowers with a pink calyx. Prunus incisa flowers very early, often as early as March or at the beginning of April. The flowers are followed by small purplish-black fruits. For parks, gardens and open verges. It prefers nutritious and humid soil. Winter hardiness zone: 6b
