

Prunus maackii 'Amber Beauty'

Height	8-12 m
Crown	oval, half-open crown
Bark and branches	flaking, yellowbrown, copper colour
Leaf	green
Autumn colour	yellow
Flowers	white, flowers in April, fragrant flowers
Fruits	black
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Paving	tolerates partial paving
Winter hardiness zone	3 (-40,0 to -24,5 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), provides food for birds
Application	avenues and broad streets, parks, squares, tree containers, cemeteries, roof gardens, large gardens
Shape	clearstem tree, multi-stem treem

Vigorous tree with an oval semi-transparent crown. Eventual height approx. 8 - 12 m. Is remarkable for the fact that the bark of the trunk and older branches has an uncommon yellow-brown to copper-yellow colour and flakes off. The oval to narrow oval leaves measure aprox. 10 cm and have a pointed top and a finely serrated edge. They are bright green in colour. The small bunches of fragrant white flowers appear in April. The tree does not produce many flowers. The flowers are followed by small black fruits. A pretty tree for use as a solitary in parks and gardens. Does not stand up to hard surfaces and fails to grow well in wet soil. Winter hardiness zone: 3
