Prunus padus 'Nana' is a small tree with a dense spherical crown. It can attain a height of 3 - 4 m. The dull brown branches smell of bitter almonds when damaged. The oval to obovate leaves are dark green and smaller than those of the species. Flowers in April and May, producing fragrant white flowers in pendulous bunches. The flowers, smaller than those of P. padus, are followed by a few black berries. Can be used in streets and small gardens. Winter hardiness zone: 3
