

## Quercus ×hispanica 'Fulhamensis'

<b>Height</b>	12-15 m
<b>Crown</b>	round/spherical, half-open crown
<b>Bark and branches</b>	grey
<b>Leaf</b>	evergreen
<b>Flowers</b>	light yellow, flowers in April
<b>Fruits</b>	brown
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	loamy soil, sandy soil, calcareous soil
<b>Soil moisture</b>	suitable for wet soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	7 (-17,7 to -12,3 °C)
<b>Wind resistance</b>	good
<b>Other resistances</b>	can withstand wind, resistant to de-icing salt
<b>Application</b>	parks, cemeteries, industrial areas, large gardens
<b>Shape</b>	clearstem tree, feathered tree, multi-stem tree

A semi-evergreen to full evergreen tree growing to 12 - 15 m. The red crown has gracefully hanging twigs which are thinner than other cultivars of *Q. x hispanica*. The thick bark is dark grey, deeply grooved and corky. The leaves are dark green on top whereas the underside has grey-white hairs. The blossom and fruit are the same as on the species. During severe cold, the leaves turn brown in the winter, only falling when the new leaves emerge. A healthy, warmth-loving tree which prefers a limy soil. There are a few types in circulation with the same name.
