

Quercus frainetto 'Trump'

Height	20 - 25 m
Crown	broad ovoid, half-open crown
Bark and branches	fine grooves, young twigs olive-green
Leaf	obovate, deeply lobed, dark green, 10 - 20 cm
Flowers	gold coloured catkins, 7 - 10 cm long, May
Fruits	ovoid acorns, 1 - 2 cm, 2 to 5 grouped together
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	nutritious, preferably loamy
Soil moisture	suitable for dry soil, suitable for wet soil
Paving	tolerates partial paving
Winter hardiness zone	6a (-23,3 to -20,6 °C)
Wind resistance	very good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Application	avenues and broad streets, parks, squares, cemeteries, industrial areas, large gardens
Shape	clearstem tree
Origin	NAKB selection, Ede, Netherlands, 1979

A selection with a steeper and more uniform manner of growth. Fairly fast-growing, with low branches that stand at an angle of 45°. The short trunk is greyish-brown and has fine grooves. Parts of the bark flake off in platelets. Young twigs are thick, hairy and olive-green. Older twigs are bare and grey. The obovate leaves are deeply and regularly lobed. The large lobes are also lobed or carry blunt serrations. The leaves are glossy dark green, the underside lighter. They are 10 - 20 cm long, sometimes longer when the tree grows vigorously. Width 7 - 12 cm. The acorns are one third to a half enclosed by the cupule: the latter is densely covered with narrow, contiguous, hairy scales. The cupules and the leaves are very characteristic of the species.
