

Quercus robur 'Concordia'

Height	6-8 m
Crown	round/spherical, half-open crown
Bark and branches	grey
Leaf	yellow
Flowers	greenyellow, flowers in May
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, acid soil, calcareous soil
Soil moisture	suitable for wet soil
Paving	tolerates no paving
Winter hardiness zone	6a (-23,3 to -20,6 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt, valuable for butterflies
Application	parks, cemeteries, industrial areas, large gardens, small gardens
Shape	clearstem tree, multi-stem treem

Quercus robur 'Concordia' is a cultivar that remains relatively small, reaching a height of 6 - 8 m. The tree has wide-spreading branches and an irregular round crown. The leaves are similar to those of the species but emerge in the spring a remarkable colour of yellow. They remain golden-yellow the entire summer. 'Concordia' is a very beautiful tree that can be used to contrast with green trees. Quite frequently it is planted in parks together with 'Pupurea'. Winter hardiness zone: 5a
