

Robinia pseudoacacia 'Myrtifolia'

| | |
|------------------------------|---|
| Height | 3-4 m |
| Crown | round/spherical, half-open crown |
| Bark and branches | brown, grey |
| Leaf | green, feathery leaf |
| Flowers | seldom |
| Fruits | fruitless cultivar |
| Spines/thorns | None |
| Toxicity | usually not toxic to people, (large) pets and livestock |
| Soil type | clayed soil, loamy soil, sandy soil, nutrient-poor soil, calcareous soil |
| Soil moisture | suitable for dry soil |
| Paving | tolerates paving |
| Winter hardiness zone | 5a (-28,8 to -26,1 °C) |
| Wind resistance | fairly |
| Other resistances | resistant to frost (WH 1 - 6), resistant to de-icing salt |
| Fauna tree | resistant to frost (WH 1 - 6), resistant to de-icing salt, valuable for butterflies |
| Application | parks, cemeteries, industrial areas, large gardens, small gardens |

Robinia pseudoacacia 'Myrtifolia' is a small-leaved cultivar with a loose, vertical manner of growth. When the tree is older the branches grow horizontally, ultimately forming a spherical crown. The height depends on the grafting position, usually approx. 3 - 4 m. The imparipinnate leaves have 9 to 19 bright green leaf segments. These are broadly ovoid to ovoid and attain a size of 1 - 1.5 cm. The slightly incised top of the leaves is striking. Leaves out late and keeps its leaves long into the autumn. Rarely blooms. Winter hardiness zone: 5a
