

## Sorbus aria 'Majestica'

|                       |  |
|-----------------------|--|
| Height                | 8-12 m   |
| Crown                 | broad ovoid, dark, dense crown   |
| Bark and branches     | grey   |
| Leaf                  | green  |
| Flowers               | white, flowers in May  |
| Fruits                | orange, red  |
| Spines/thorns         | None   |
| Toxicity              | usually not toxic to people, (large) pets and livestock                                      |
| Soil type             | loamy soil, sandy soil, calcareous soil  |
| Paving                | tolerates paving   |
| Winter hardiness zone | 5a (-28,8 to -26,1 °C)   |
| Wind resistance       | fairly to good   |
| Other resistances     | resistant to frost (WH 1 - 6), can withstand wind  |
| Fauna tree            | resistant to frost (WH 1 - 6), can withstand wind, provides food for birds                   |
| Application           | avenues and broad streets, squares, tree containers, cemeteries, roof gardens, large gardens |
| Shape                 | clearstem tree   |

This tree forms a compact, broad, pyramidal crown. Height 8 - 12 m. At a later stage the crown becomes broad ovoid with fairly dense and closed branches. Because of its slow growth rate and the fact that it stands up well to hard surfaces 'Majestica' is a good avenue and street tree. The flowers are the same as those of the species. The leaves are considerably larger and have practically no autumn coloration. They remain on the tree until well into November. The large fruits are dark orange-red but not very remarkable. Winter hardiness zone: 5a
