Sorbus aucuparia 'Aspleniifolia' is a cultivar distinguished from the species by its leaves that are more deeply serrated to almost separated. Some leaflets have 1 or 2 small lobes and the underside of the leaves shows a remarkably thick growth of felt-like hairs. 'Aspleniifolia' has an oval crown and reaches a height of approx. 8 - 12 m. It flowers similarly to the species and the orange-red fruits remain on the tree until well into the autumn. Winter hardiness zone: 4
