

Tilia cordata 'Monto'

Height	4-6 m
Crown	round/spherical, dark, dense crown
Bark and branches	brown, grey
Leaf	green
Flowers	cream white, flowers in June, fragrant flowers
Fruits	grey
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Soil moisture	suitable for dry soil
Paving	tolerates paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
Application	parks, squares, tree containers, cemeteries, coastal areas, large gardens, small gardens, patio gardens

Very compact, slow-growing Dutch cultivar of *T. cordata* that, when grafted on a stem, grows to become a small, spherical tree with a crown diameter of max. 3 m. The young twigs are dark brown, a significant difference with the cultivar 'Lico'. The bright green leaves have a somewhat heart-shaped base and taper to a point at the top. They remain much smaller than those of the species, approx. 2 - 4 cm. Due to its modest size, 'Monto' is suitable for small front gardens, patio gardens, roof decks and plant containers. Was brought onto the market at the same time as 'Lico'. Winter hardiness zone: 4
