

Tilia platyphyllos 'Delft'

Height	30-35 m
Crown	broad conical, half-open crown
Bark and branches	grey
Leaf	green, yellowgreen
Flowers	yellow, flowers in June, fragrant flowers
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates no paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
Application	avenues and broad streets, parks, squares, cemeteries, large gardens, windbreaks
Shape	clearstem tree

A linden with a uniform manner of growth and a broad, pyramidal crown. The trunk is light grey and later grooved. Unlike the species, the young twigs are a greenish colour. The leaves are heart-shaped with a tapered top and a slanted heart-shaped base. The leaf edge is sharply serrated. The upper side of the leaf is brighter green than those of the species, while the underside is light green with soft hair. The leaves do not fall off until late in the autumn. The aromatic flowers grow in pendulous umbels of 3 to 5 together, the stemmed bract is approx. 5 cm. 'Delft' is fairly unsusceptible to aphids. Winter hardiness zone: 4
