

Tilia platyphyllos 'Laciniata'

Height	10-15 m, slow growing
Crown	broad conical, half-open crown
Bark and branches	grey
Leaf	green
Flowers	yellow, flowers in June, fragrant flowers
Fruits	grey, brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates no paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
Application	avenues and broad streets, parks, squares, cemeteries, large gardens
Shape	clearstem tree, multi-stem treem

A Dutch selection with a compact manner of growth and an ovoid to pyramidal crown with a flattened top. Height up to approx. 20 m. The trunk is light grey and later grooved. After one year, twigs are hairy and bright green, becoming bare in the winter. The leaves are 8 – 12 cm in size, round to ovoid with a tapered top and a slanted heart-shaped base. The leaf edge is sharply serrated. The upper side of the leaf is dark green while the underside is lighter with soft hair. They remain on the tree long into the autumn. Aromatic flowers appear in pendulous umbels. 'Naarden' is fairly unsusceptible to aphids. Winter hardiness zone: 4
