

Tilia platyphyllos 'Örebro'

Height	15-18 m, slow growing
Crown	narrow conical, half-open crown
Bark and branches	grey
Leaf	green
Flowers	light yellow, flowers in June, fragrant flowers
Fruits	green, grey
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
Application	avenues and broad streets, parks, squares, cemeteries, large gardens
Shape	clearstem tree

A slow-growing Swedish cultivar with a regular, closed, narrow, pyramidal crown that reaches a height of 15 - 18 m. The lateral branches grow steeply ascending at first and after about 10 years they bend, forming an ovoid crown. The leaves are round to ovoid with a tapered top and a slanted heart-shaped base. The leaf edge is sharply serrated. The upper side of the leaf is lighter green than those of the species and the leaves remain on the tree longer. This linden blooms more profusely than does the species with aromatic flowers. 'Örebro' is very similar to 'Delft'.

Winter hardiness zone: 4
